

A40 Farina Club's downloadable and (almost*) fully text-searchable Spares Booklets

**a few entries are too pale for the recognition software to identify*

These three booklets contain a comprehensive overview of A40 spares and their sources, and represent a vast amount of research by Club member Paul Stapleton which culminated in their publication in 1998. The passing years have rendered the flanking booklets and their contact details *suitable only as archive material* but the central, red covered, **Spares Guide** contains many exploded views which originally appeared in the Austin, BMC & BL Workshop Manuals along with the relevant product Identifier Codes and may prove useful as reference when working on the car. There are still strict copyright restrictions for the illustrations in place from the original publishers and for the booklets themselves from the A40 Farina Club Ltd. These booklets can be downloaded only on the understanding that they must not be re-printed, distributed or sold and are solely for the personal use of whoever downloads them.

HOW TO HELP KEEP THIS LIST UP TO DATE

If you discover a source of A40 Farina parts not mentioned in this list, either a manufacturer or a supplier of new or secondhand parts, please let the A40 Farina Club Spares Co-ordinator know so that the source can be included in the next edition of this list. Equally we would like to know of any manufacturer or supplier listed here as a source that can no longer supply the part(s) indicated against their name.

DISCLAIMERS

Whilst ever care has been taken to ensure that the information published in this Availability/Sources List is correct, neither the A40 Farina Club nor the author are able to accept any responsibility for any omissions or errors. These may be due to incorrect or subsequently outdated information from suppliers. However, we would be grateful to be informed of any errors in order to correct future editions.

The mention of a manufacturer or supplier in this publication does not imply a recommendation.

HOW TO USE THIS LIST

Whenever a part is needed, please turn first of all to this List and the associated A40 Farina Club Spares Guide (5th Edition), rather than contacting the Club Spares Co-ordinator. The latter should be resorted to only when these publications fail to lead to a source for the part required.

STEP 1 : Turn to the Spares Guide Contents (page i) and look up the heading most likely to include the part required.

STEP 2 : Turn to the page in the Spares Guide containing the desired heading, locate the part in the diagrams (if present) and/or look up its part number in the list nearby. If it is listed, go to STEP 3 below.

STEP 2a : If it is not listed, return to the Contents page and try another heading.

STEP 2b : If that is unsuccessful, contact the Club Spares Co-ordinator (details in the current 'Farina News') who may be able to find a source for rarely requested parts.

STEP 3 : Turn to the Spares Availability & Sources List Contents (page ii). Look up the page of the BMC/BL/Rover Part Number Index that contains the part number required.

STEP 4 : Against the part number are one or more Source Codes, each of which may be followed, in brackets, by a supplier's part number, or by a manufacturer's code, followed by their part number where known.

eg MF (MP : M7153)

MF = Source code : in this case, any supplier listed under Source MF in the Spares Availability & Sources List.

MP = Manufacturer's code (see page 3).

M7153 = Manufacturer's part number.

eg M4 (S171)

M4 = Source code : in this case, only supplier no. 4 listed under source M in the Spares Availability & Sources List.

S171 = Part number used by this supplier.

STEP 5 : Return to the Spares Availability & Sources List Contents (page iii). Look up the page of the Source group required, eg for 'M4' look up 'M', and turn to that page to find, in most cases, the supplier's name, address, phone number and other details.

STEP 6 : When contacting a supplier, quote their part number (where known) and the description of the part as in the Spares Guide. You may be asked for the exact make, model and year of your car. You may have to order the part, especially if it is not common to other cars. It is worth shopping around as some suppliers offer general discounts or special discounts to A40 Farina Club members.

STEP 7 : If you have tried all the sources listed against a part without success, contact the Club Spares Co-ordinator for help.

It is also worth checking the advertisements in 'Farina News' and the classic car press for new and secondhand spares, and placing 'spares wanted' advertisements in these publications.

BMC/BL/ROVER PART NUMBER INDEX & SOURCE CODES

Manufacturers' codes (see 'How To Use This List' STEP 4) :

AO = Alexander Oddpak	L = Lucas
AP = AP Lockheed	MP = Moprod
B = Bosch	N = NGK
CH = Champion	P = Pearl
FE = Ferodo	Q = Quinton Hazell
H = Halfords	R = Ring

'Alt' before a Source Code

means an alternative part that differs from the original but is a suitable substitute.

' - E' after a Source Code or after a Part Number

means a reconditioning service is available, for which your old part may be required in exchange for the reconditioned one.

' - s/h' after a Source Code or after a Part Number

means a secondhand (i.e. used) part.

'Supplier, possible' above a Source Code

indicates an element of doubt because

- a) the supplier's stock is regularly changing
- or b) the supplier has not sent the Club a catalogue
- or c) the part appears only from catalogue illustrations to be suitable.

In such cases members are strongly advised to check with the supplier before purchase to avoid disappointment.

'or use' after all other codes

means that if a part cannot be obtained an alternative part number, which may include the required item, can be used instead.

'See Note' after all other codes

Notes appear at the end of this section on page 42 and you are advised to read the relevant Note before proceeding any further.

NOTES FOR PART NUMBER INDEX & SOURCE CODES

- Note 1: available only as a set of 4, which may include piston rings and gudgeon pins
- Note 2: available only as a set of top, 2nd, 3rd and scraper rings for all 4 pistons
- Note 3: available only in a set of 4 pistons - see 'Pistons' for part numbers
- Note 4: exchange crankshafts supplied with bearings to fit
- Note 5: available only as a pair of washers (upper and lower) unless indicated by *
- Note 6: available only as a sump gasket set (gaskets + oil seals) unless indicated by *
- Note 7: the alternative filler caps incorporate a filter
- Note 8: these coils fitted with spade terminals secured by nuts; the spades can be removed if screw terminals are required
- Note 9: parts indicated by * may be copper core rather than carbon core
- Note 10: includes clips unless indicated by *
- Note 11: supplier A3 will make part to sample or pattern
- Note 12: the alternative cylinder is that for earlier Minis, which is identical to the A40 cylinder except for the pushrod
- Note 13: the alternative universal joints are non-greasable
- Note 14: suppliers A2 and R6 fit and ream kingpin bushes - customer supplies all parts. Suppliers Q2, T1, T3 (1098cc cars only) and T4 may offer such a service.
- Note 15: suppliers Q2(B18) and T4 supply threaded outer bush sets for d.i.y. reconditioning
- Note 16: supplier H1 can also supply linings and rivets (front : H1/7/2; rear: Mk. 1 AT/28/1, Mk. 2 MO/33/1 or /2) and will also reline old shoes
- Note 17: the alternative rubber bushes need shortening to fit the A40
- Note 18: or use 21A475 + 1/16" o.d. oversize bush for rear eye from supplier Q2 (D10B)
- Note 19: the following supply complete clutch kits:
- early 948cc (GRB101 + GCC104 + GCP102AF) : Q2(AE4 early 948cc - new or E), T1 (GCK254AF), UD (GCK101AF)
- later 948cc (GRB101 + GCC105 + GCP102AF) : H1 - new or E, Q1, Q2(AE4 late 948cc -new or E), R2 (COM703A), R3(GCK254AF), R5, T1 (GCK100AF), UD (GCK100AF)
- 1098cc (GRB102 or GRB103 + GCC106 + GCP103AF) : H1 - new or E, Q1, Q2 (AE4 1098cc - new or E), Q3, R2 (COM707A), R3(GCK255AF), R5, T1 (GCK260), UD (GCK103)
- Note 20: the alternative switches have screw terminals
- Note 21: some suppliers of radial tyres can order these for you : see 'Tyre Dealers & Distributors' in 'Yellow Pages'
- Note 22: the alternative gaskets lack the peak and slots at the top and may also differ in thickness
- Note 23: the alternative window channels need fabricating to fit
- Note 24: the alternative badge and surround are those for the Mini Mk. 1 bonnet; due to slight differences in shape the Mini badge is unlikely to fit the A40 surround or vice versa; check that the fixings can be adapted to fit the A40 grille
- Note 25: use a 2 1/2" square cut from these 3" wide rubber glazing strips and glue to seat frame

SOURCES

The following list was prepared by circulating 200 potential suppliers, culled from the previous Spares Guide, Farina News (all issues pre-1995) and relevant entries in the 'Practical Classics Directory of Parts Suppliers & Specialist Services' for 1990/91. Suppliers were encouraged to send details of specific A40 spares stocked and those that did have been referred to in the previous section by Source Code under the 'Supplier, definite' column. Their full details follow here, along with those of 'possible' suppliers who did not give details of individual parts stocked but asked to be included in the Spares Guide as A40 parts suppliers.

The previous section and the following list are therefore by no means comprehensive, because:

- there are probably other suppliers not known to us, who were therefore not invited to place a free entry in the Guide.
- barely half of the potential suppliers gave a positive response - the many that did not respond may nevertheless stock A40 parts.
- of those suppliers who did respond, some did not give details of individual parts stocked, so they get only an occasional mention in the previous section as a 'possible' source.

Sources are grouped in sections according to the type of spares stocked and each entry is in a standard format as shown by the following fictitious example :

RA. ROVER AGENTS

Part available from Rover Agents, quoting the Spares Guide part number. If the part has to be ordered a minimum quantity may have to be purchased, as indicated in the previous section. See under 'Car Dealers' in 'Yellow Pages'.

See also sections RAF, RAU, UD.

RAF. ROVER FIND-A-PART SERVICE

An obsolete part available, when last investigated by the A40 Farina Club, from one or more Rover Agents subscribing to the Find-a-Part service. Quote the Spares Guide part number to any Rover Agent (see under 'Car Dealers' in 'Yellow Pages') and ask them to give you the name(s) & telephone number(s) of agent(s) on the Find-a-Part microfiche that still stock this part. You then contact the agent(s) concerned and negotiate price and whether they will deal by post. If no telephone number is given for a particular agent, telephone the Customer Help Desk, Oxford on 01865 778966.

RAU. ROVER UNIDIAL SERVICE

An obsolete part which may be available from one or more Rover Agents subscribing to the Unidial service. Quote the Spares Guide part number to any Rover Agent (see under 'Car Dealers' in 'Yellow Pages') and ask them to give you the name and telephone number of an agent on the Unidial computer disc that still stocks this part. Only the nearest stockist (if any) will be quoted. You then contact the agent concerned and negotiate price and whether they will deal by post. Any obsolete BMC/BL/Rover part may be searched for by this system but 'RAU' has normally been quoted as a 'possible' source only where no 'definite' supplier is known to the club.
